idk

Hello guys.

I wanted to show you a cool method to piss of streamer and make the chat go crazy ^ You can also troll your friends by inviting them to a ranked team over a Summoner Name like for ex. Riot Phreak.

Here you go:

1. Download the latest version of **Psi** here: <http://psi-im.org/> (<http://psi.softonic.de/>)

2. After you downloaded Pidgin, set your Account up as following image:

The first screenshot shows the 'Psi: Benutzerkonto-Einstellungen' window. The 'Benutzerkonto' tab is selected. The 'Name' field contains 'pvp.net'. The 'Jabber-ID' field contains 'pvp.net'. The 'Kennwort' (Password) field contains 'AIR_yourpassword123'. The 'Einstellungen' (Settings) section has checkboxes for 'Beim Start automatisch verbinden', 'Verbindung nach Ruhezustand automatisch wiederherstellen', 'Verbindung nach Verbindungsabbruch automatisch wiederherstellen', and 'Nachrichtenchronik aktivieren'. The 'Speichern' (Save) button is visible.

The second screenshot shows the 'Psi: Benutzerkonto-Einstellungen' window. The 'Verbindung' (Connection) tab is selected. The 'Verbindungs-Proxy' dropdown is set to 'Keiner'. The 'Daten komprimieren (falls möglich)' checkbox is unchecked. The 'Keep-Alive-Pakete senden (um Zeitüberschreitungen zu verhindern)' checkbox is checked. The 'Server-Namen und -Port manuell angeben:' checkbox is checked. The 'Server' field contains '185.40.64.69' and the 'Port' field contains '5223'. The 'Verbindung verschlüsseln' dropdown is set to 'Altes SSL'. The 'Auf altem SSL-Port versuchen' checkbox is checked. The 'Unverschlüsselte Authentifizierung erlauben:' dropdown is set to 'Über verschlüsselte Verbindung'. The 'Speichern' (Save) button is visible.

Use the IP addresses below:

EU West : **185.40.64.69**

EU Nordic & East : **66.150.148.21**

US : 192.64.174.69

Oceania : **192.64.169.22**

Brazil : **66.151.33.22**

Turkey : **95.172.65.28**

Russia : **95.172.65.245**

Latin America North : **66.151.33.248**

Latin America South : **66.151.33.249**

Public Beta Environment : 69.88.138.26

3. Now you should be logged in. You should see your friendlist soon. If you don't see it, log in to League of Legends and leave Psi open.

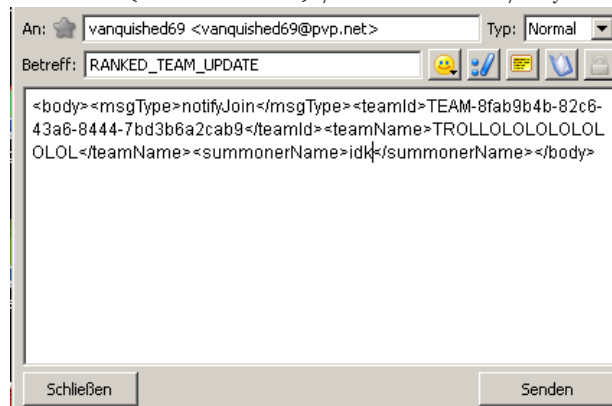

4. Now, how do you send a message to someone who isn't on your list? Simply add the in League of Legends while leaving Psi open. After you've added them, check your Psi client and you'll see a new person there called something like: SUM2301238@PVP.NET

5. Left click on them and click "Send Message".

6. Put this as a title: RANKED_TEAM_UPDATE

The message needs to be added as following:

```
<body><msgType>notifyJoin</msgType><teamId>TEAM-8fab9b4b-82c6-43a6-8444-7bd3b6a2cab9</teamId><teamName>HERE YOU CAN ENTER THE TEXT WHICH YOU WANT TO SEND THEM(IT WILL BE SHOWN AS THE RANKED TEAM NAME)</teamName><summonerName>HERE YOU CAN ENTER THE NAME OF THE PERSON WHO SENDS THE INVATION(Ex. Riot Phreak)</summonerName></body>
```

7. Send the message and watch the stream go crazy. (Spamms inc.)

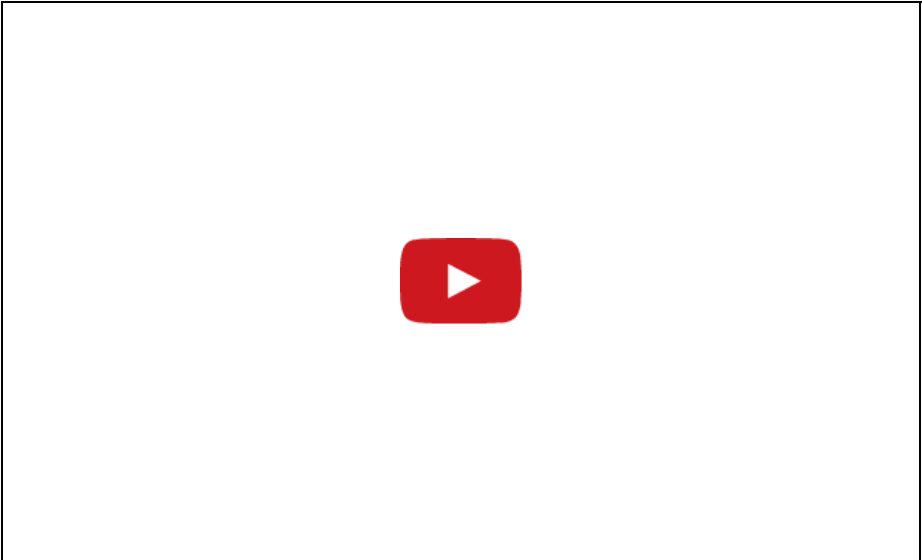

Fun fact, you can send all kind of ascii images, for example:

DON'T CLICK THIS IF YOU'RE UNDER 14

Here's a video of me trolling Doublelift while streaming:

Please leave me a like if this guide helped you out, really appreciate it.
